

Jimmy's Roofing offers a routine preventative maintenance program for commercial properties in the region. Our experts are happy to offer you these benefits and processes of our program:

- ✓ Proactive. We can help fix small problems before they become a disaster.
- ✓ Revealing. While most business owners only inspect their roof when they have a leak, we can find leaks or the start of leaks before they happen.
- ✓ Planned & Organized. This allows our experts to come up with responsible, safe management plans for your roof, while being easier on your budget.
- ✓ Fast. Get faster response times for quick fixes by finding issues faster with a regular maintenance program.
- ✓ Inspect every last flashing and leave no seam unprobed.
- ✓ VIP Status. If a storm or disaster strikes, you get first priority.

RPM PROGRAM
